PEOPLE

PEOPLE Proficiency Assessment

Developing	Foundational	Advanced	Mature
<ul style="list-style-type: none">• Individual contributors with no coordination and no centralized management to focus on efficiency and/or workload balancing. No assigned project manager.• No prioritization of work to be performed (fire hose vs. faucet).• Lack of deep subject matter expertise in rules and global IP office procedures.• Lack of development roadmap for skills growth or career advancement.• Lack of defined approach or assigned responsibility of general office management tasks (HR, billing, records, IT, systems, etc.)• Lack of established invoice management/billing review. All functions managed manually and individually.	<ul style="list-style-type: none">• Practices shared informally within working groups or decentralized teams.• Subject Matter Experts (SMEs) in the areas of patent and TM prosecution and docketing.• Administrative support staff for routine general tasks and word processing needs.• Decentralized managers/lack of discrete teams for various functions (paralegals, docketing, admin/WP, IT, records).• No centralized individual(s) who establish skill set roadmaps and coordinate development efforts.• Lack of single point of contact or ownership/SME for various work streams or records management.• Ad hoc training and development in use of research/analytics databases.• Invoicing support to review and manage invoices. For in-house teams, invoices reviewed by individual practitioners and outside counsel invoices managed by central individual.• General core HR individual(s) to manage employee relations, payroll and performance.	<ul style="list-style-type: none">• Dedicated teams formed to provide services within functional areas (e.g., eBilling, docketing, annuities, application filing, IT systems support, records management) with established functional managers.• Coordination of customer numbers and practitioner registration numbers to allow visibility, tracking and organization of portfolios and PAIR access.• Centralized function to establish skill set roadmaps and coordinate development efforts.• Single point of contact or ownership/SME for various work streams or records management.• Coordinated training and development in use of research/analytics databases and best practices.• Centralized invoice and billing management individual(s) responsible for all aspects of eBilling, inquiries, and serving as an escalation point.• Basic LPO/PMO individuals to manage projects across the department and provide updates to management	<ul style="list-style-type: none">• Enterprise-level team established with team charter, clear roles and responsibilities, and led by a professional with a seat on the relevant patent executive/management committee.• Security/Privacy officer to ensure ongoing understanding and compliance with GDPR, export control and other global regulations.• Dedicated individuals or teams focused on research and analytics.• Technology expertise aligned to portfolio to allow attorney and engineer perspective on strength of case and strategic relevance.• Established LPO/PMO to manage projects across the department/organization. This individual works with practice management and leadership to map projects to strategy and manage resource allocation, budget/scope and project reporting/dashboards.• Training and development individual to drive adoption of tools, processes and other key learning opportunities. This individual leads change management function and compliance.

PEOPLE Proficiency

Actions & Tasks to Move to a More Mature Level

Developing	Foundational	Advanced	Mature
	<ul style="list-style-type: none">• Exchange operational practices informally to share knowledge and develop common ways of working• Establish an administrative support team for routine general tasks.• Identify SME/SPOC in the areas of patent/TM prosecution and docketing.• Provide ad hoc training for systems and the use of research/analytics databases.• Establish a process for invoice review and support.• Identify an HR business partner to manage team development, payroll and performance.	<ul style="list-style-type: none">• Establish a centralized IP operations team including functional teams led by dedicated functional managers in the areas of docketing, annuities, filing, eBilling, IT systems, records management and vendor management.• Develop skill set roadmaps for team members to coordinate and encourage professional development efforts.• Create and deliver coordinated training to team members and customers on relevant IP operations systems, processes, research/analytics databases and best practices.• Centralize responsibility for invoice and/or billing management and identify a SPOC responsible for all aspects of eBilling and all related inquiries.• Identify team member(s) with basic project management skills to manage operations-related projects and provide updates to management.	<ul style="list-style-type: none">• Create an enterprise-level team with a team charter with clear roles and responsibilities for team members and led by a professional with a seat on the relevant patent executive/management committee.• Hire a dedicated Security/Privacy officer to ensure ongoing understanding and compliance with global regulations (e.g., export control, GDPR).• Hire a dedicated professional to oversee training, development and change management to drive understanding and adoption of tools, processes and other key learning opportunities.• Establish a project management function to manage operations related projects across the organization.• Ensure projects align with and support IP strategy and are managed within budget.• Establish a team to focus on business intelligence, legal research and analytics.

PROCESS

PROCESS Proficiency Assessment

CATEGORY	Developing	Foundational	Advanced	Mature
Analytics	<ul style="list-style-type: none"> Lack of metrics, quality review, or KPI's for in-house legal professionals and staff and OC/vendors. 	<ul style="list-style-type: none"> Basic data quality and performance metrics generated for management. 	<ul style="list-style-type: none"> Bucketized technology classifications/taxonomies to allow deeper analysis of portfolio coverage. Ability to monitor process metrics for compliance and to identify trends. 	<ul style="list-style-type: none"> Robust and well-defined data quality and audit capabilities/measured KPI's managed on routine basis with centralized ownership. Regular strategy-driven planning sessions based on data/metrics that allow the organization to respond proactively to opportunities and challenges, and new product launches.
Annuities/Maintenance Fees	<ul style="list-style-type: none"> Annuities managed by OC or international counsel directly. 	<ul style="list-style-type: none"> Foreign annuity process managed by experienced vendor and U.S. MFs paid by in-house staff. 	<ul style="list-style-type: none"> U.S. MF's and annuities globally managed by reputable provider with ongoing reviews for cost measures. 	<ul style="list-style-type: none"> All global annuities/MFs (patent and trademark) managed by reputable provider with incorporated analytics to drive pay decisions.
Asset Management	<ul style="list-style-type: none"> Minimal or non-existent management of IP assets; rely on OC for asset reporting and tracking. 	<ul style="list-style-type: none"> IP assets are actively tracked and managed in-house, by OC, or a hybrid approach. 	<ul style="list-style-type: none"> Well defined process for in-house vs. OC/vendor management of assets and data which allows for flexibility/agility of approach. Comprehensive rating program for portfolio assets that maps to company strategy. Well-defined acquisitions and divestitures process for management of assets. 	<ul style="list-style-type: none"> Clearly established best practices for asset management with routine compliance reviews and quality measurement.

PROCESS Proficiency Assessment

CATEGORY	Developing	Foundational	Advanced	Mature
Change Management	<ul style="list-style-type: none"> Absence of standard operating procedures and in-house change management expertise. 	<ul style="list-style-type: none"> Central repository for procedures with reviews at a defined cadence and basic change management process for advising organization of changes. 	<ul style="list-style-type: none"> Annual strategy planning process to identify change needs or address new opportunities. 	<ul style="list-style-type: none"> Established change management/knowledge management practices for all processes and data. Active knowledge management and change management committees. Routine reviews and compliance checks for adoption of new processes.
Docket Management	<ul style="list-style-type: none"> No central oversight of deadline/docket compliance. 	<ul style="list-style-type: none"> Automated deadlines managed through centralized docket system with law engine/jurisdiction laws. Some manual processing required. Docket provided to attorneys on set schedule, may still be manual for designs, copyright. 	<ul style="list-style-type: none"> Law engine logic is kept up-to-date for applicable patent jurisdictions, other jurisdictions and IP types may still require manual update. All deadlines are automatically driven via workflows and (regularly updated) law engine logic. Attorneys can self-serve docket with some ability to filter, sort, etc. Central oversight and analysis of compliance with deadlines and filing requirements by in-house legal staff and OC/vendors, including analysis of late fees, extensions of time, etc. 	<ul style="list-style-type: none"> Law engine logic kept up-to-date for all jurisdictions and IP types.

PROCESS Proficiency Assessment

CATEGORY	Developing	Foundational	Advanced	Mature
Export Controls	<ul style="list-style-type: none"> Lack of defined export control procedures. 	<ul style="list-style-type: none"> Manual process for managing export control reviews Billing guidelines include export control requirements. 	<ul style="list-style-type: none"> Well defined export control review processes with clearly defined workflows and escalation path. Identification of export control relevancy determined by human review/interpretation. Engagement with corporate export control team limited to 'as necessary'. Ongoing process to ensure OC/vendor compliance with export controls. 	<ul style="list-style-type: none"> Automated identification of materials relevant to a particular export-controlled technology area. Close coordination with company export control team to ensure ongoing compliance. Established cadence for auditing and refreshing program on recurring basis (at least annual). Automated monitoring/AI capabilities to identify export control breaches and risks both inhouse and with OC/vendors.
Invention Mining	<ul style="list-style-type: none"> Little to no solicitation of ideas by IP legal staff; employees approach IP legal staff with disclosures ad hoc. 	<ul style="list-style-type: none"> Intermittent invention mining conducted; basic education of employees on documenting their work to assist with mining. 	<ul style="list-style-type: none"> Formal invention mining program in place, including regular rotating meetings with different BUs; inhouse team stays abreast of industry developments to inform filing decisions and guide inventors. This may include OC or vendor support and coordination of invention mining. 	<ul style="list-style-type: none"> Employees and attorneys draft disclosures in real time at regular meetings. Regularly scheduled Patent-athon/Hackathon type activities to drive invention mining.

PROCESS Proficiency Assessment

CATEGORY	Developing	Foundational	Advanced	Mature
Inventor/ Contributor Country- Specific requirements	<ul style="list-style-type: none">Limited understanding of jurisdiction-specific requirements.Process for securing foreign filing permission only for limited countries.No process for ensuring proper 'claiming' of IP per regional employment laws.No dedicated remuneration program.	<ul style="list-style-type: none">Basic understanding of what regions inventors/contributors are located in (cross-company where innovation is happening).Basic process documentation to ensure foreign filing permission and remuneration requirements are met.Inconsistent approach around 'claiming'.Remuneration program implemented; details manually gathered and tracked on spreadsheets; coordination with department making payment handled via email.	<ul style="list-style-type: none">Documentation detailing requirements for each region known to have inventor/contributors based on historical filing data.Process for each jurisdiction specific requirement with guidelines explaining the nuances and when the requirement applies.Consistent approach and process for 'claiming' IP implemented in place for most jurisdictions.Remuneration tracked through asset management database with reporting capabilities and potentially some automation of data entry (depending on complexity of company's program).Coordination with OC to confirm inventor compliance with remuneration program rules.Established audit process to ensure data quality.	<ul style="list-style-type: none">Automated flagging/identification of inventors/contributors having special requirements.Automated audit reports identifying risk and compliance issues.

PROCESS Proficiency Assessment

CATEGORY	Developing	Foundational	Advanced	Mature
Jurisdictional Filing	<ul style="list-style-type: none"> Domestic filing only. 	<ul style="list-style-type: none"> Foreign filing decisions made ad hoc / last minute and not mapped to a portfolio strategy. 	<ul style="list-style-type: none"> Defined process for reviewing foreign filing decisions and national phase filings that is mapped to portfolio technology and overall business strategy. Synergy between domestic and foreign outside counsel to ensure common approach to technology coverage globally. 	<ul style="list-style-type: none"> Formalized foreign filing strategies mapped to technology/strategic value/global market opportunities with analytics/AI to assist in selection.
Knowledge Management	<ul style="list-style-type: none"> No system in place to share best practices / best-in-class work product. Templates based on individual preferences. 	<ul style="list-style-type: none"> Various processes shared between small groups. 	<ul style="list-style-type: none"> Basic knowledge management program to bring consistency across similar work groups; repository for information sharing 	<ul style="list-style-type: none"> Formalized knowledge management program with single-sourced repository, ability for cross-team input, possibly including Q&A bots and chat features.
Onboarding/ Training IP Legal Department Employees	<ul style="list-style-type: none"> Informal/inconsistent onboarding program for new hires; new employees learn about existing processes and systems from co-workers. 	<ul style="list-style-type: none"> General onboarding process for all new hires with training available on IP-related and other key business systems, e.g., docket systems, and processes. Attorney and staff training as needed on changes in the law and developing trends in the practice area. 	<ul style="list-style-type: none"> Structured onboarding materials for each IP functional area with required trainings (privacy/security, ethics, export control, trade secret and other items deemed business critical). Process for monitoring compliance and gathering feedback for further refinement. Training about, and exposure to, company's lines of business. Regular cadence of trainings on legal trends and best practices. 	<ul style="list-style-type: none"> Dedicated onboarding portal providing customized materials for each new hire based on their individual role/responsibilities and assigned mentor to assist with training and relationship-building internally and with OC. Regular, deep-dive training on company's current and future lines of business and strategy that affect IP. Robust ongoing legal education offerings to ensure teams kept abreast of trends in the industry and best practices learnings.

PROCESS Proficiency Assessment

CATEGORY	Developing	Foundational	Advanced	Mature
				<ul style="list-style-type: none"> Automated mechanism for ensuring compliance, tracking attendance and gathering feedback.
Outside Counsel Management	<ul style="list-style-type: none"> Each in-house attorney chooses which OC to use; no centralized coordination and no consistency of standards. 	<ul style="list-style-type: none"> Centralized management of OC selection and use with reviews of provider selection on ad hoc basis. Ad hoc quality reviews of in-house and OC/vendor work. 	<ul style="list-style-type: none"> Well-defined and evangelized OC procedures for patent and TM drafting, prosecution and ongoing coordination. RFP process to solicit competitive bids from IP firms to ensure best-in-class pricing models, technology support, and strategic IP thinking. Could be used to develop Preferred Provider network. Routine feedback process for ongoing management of quality and timeliness. 	<ul style="list-style-type: none"> “Outside Counsel Days” held at regular intervals to encourage IP landscape and Patent & Trademark Office knowledge sharing. ML/AI capabilities for analyzing OC/vendor impact against strategy, and value propositions against cost.
Patent/TM Prosecution Task Management	<ul style="list-style-type: none"> Reliance on vendor or OC to manage all drafting, preparation, and opinion work. 	<ul style="list-style-type: none"> Hybrid in-house and external management of drafting, preparation, opinion work. 	<ul style="list-style-type: none"> Defined strategy for in-house versus outside resourcing model to manage all drafting, preparation, opinion work. 	<ul style="list-style-type: none"> Routine reviews of metrics to determine ROI of working model; KPI's to measure efficiency of working model and assess further optimization opportunities.
Records Management	<ul style="list-style-type: none"> Paper file system. 	<ul style="list-style-type: none"> Hybrid paper and electronic processing of patent and TM files. 	<ul style="list-style-type: none"> Primarily paperless, limited use of paper files. 	<ul style="list-style-type: none"> 100% digital except for storage and tracking of original signature documents and letters patents.

PROCESS Proficiency Assessment

CATEGORY	Developing	Foundational	Advanced	Mature
Reporting	<ul style="list-style-type: none"> Reporting done manually through spreadsheets on as-needed basis. 	<ul style="list-style-type: none"> Basic reporting capabilities through system or simple reporting platform. Subscription reports may be available. 	<ul style="list-style-type: none"> Well-established reporting platform providing ability to produce real-time. Rich data/analytics around portfolio contents and strength Both self-service and subscription reports available. 	<ul style="list-style-type: none"> Advanced reporting capabilities enabling deeper data analytics and business intelligence by combining multiple data sources, e.g., marrying patent data with finance data (e.g. costs per application by jurisdiction, comparative cost assessment by OC), ability to generate specialized dashboards with advanced representations of data.
Technology	<ul style="list-style-type: none"> No established technology processes. 	<ul style="list-style-type: none"> Ad hoc audits for asset management/docketing data quality and system health checks. 	<ul style="list-style-type: none"> Routine/ongoing audit process to ensure asset management/docketing data quality, system health, workflow efficiency and law-engine accuracy and compliance. 	<ul style="list-style-type: none"> AI-supported audit capabilities for real time monitoring of asset management/docketing data quality, system health, workflow efficiency and law-engine accuracy and compliance. Ongoing, regular reconciliation of assets and docketing deadlines between in-house and OC docketing systems to ensure accuracy.
Vendor/OC Billing Arrangements	<ul style="list-style-type: none"> No structured review of invoices and payments. 	<ul style="list-style-type: none"> Basic process for reviewing invoices and managing payments. Some analytics around reviewing multiple bills across matters handled by one OC. 	<ul style="list-style-type: none"> IP group-wide, standardized process for reviewing invoices and payments process. Analytics around reviewing multiple bills across matters and across OCs. 	<ul style="list-style-type: none"> Sophisticated, automated system for reviewing invoices, processing payments, and interacting with vendors related to errors. Extensive/in-depth analytics across bills, matters, OCs to identify issues/trends and extended audit capabilities.

PROCESS Proficiency Assessment

CATEGORY	Developing	Foundational	Advanced	Mature
Vendor Feedback	<ul style="list-style-type: none"> No process for soliciting feedback internally or externally. 	<ul style="list-style-type: none"> Ad hoc feedback solicitation process. 	<ul style="list-style-type: none"> Routine feedback solicitation process with ongoing in-house reviews to address quality, compliance and cost issues with OC/vendors. 	<ul style="list-style-type: none"> Established OC/vendor feedback committee who routinely reviews and shares feedback, driven by quality and timeliness metrics. Standardized Service Level Reports, including benchmarking and performance improvement tracking, regularly shared with OC/vendors.
Workflows	<ul style="list-style-type: none"> Informal/inconsistent and undocumented workflows and processes. Workflows based on individual preferences. No automation of process/workflows. 	<ul style="list-style-type: none"> Primarily standardized process/workflows and documentation/SOPs implemented. Hybrid use of automation and manual processes/workflows. 	<ul style="list-style-type: none"> Well-defined process/workflow documentation. Emphasis on automation as a general approach when defining process/workflows. Automation of most process/workflows with limited need for manual solutions. Ability to monitor for compliance and identify trends. Evolving workflows that address real time needs 	<ul style="list-style-type: none"> Robust, well-defined processes implemented electronically. Documented workflows for each business process within a department. Process ownership and escalation/approval path for changes.

PROCESS Proficiency

Actions & Tasks to Move to a More Mature Level

CATEGORY	Developing	Foundational	Advanced	Mature
General		<ul style="list-style-type: none"> Standardize basic/required process for general use by internal staff Identify metrics for determining satisfaction of operational goals and adherence to procedures. Develop reports for general use (e.g. attorney docket report) & management (e.g. metrics on number of cases assigned to each attorney to monitor workload). Develop Standard Operating Procedure (SOP) documents for each process managed by operations (including processes driven/executed by external vendors (e.g. outside counsel). Create general onboarding process for all new hires with training available on IP-related and other key business systems 	<ul style="list-style-type: none"> Develop process and mechanism for operations to monitor compliance with standard processes and identify trends. Engage with business groups to improve team-specific processes and expand number of standardized processes. Evolve and expand metrics to ensure operational goals are being met at deeper level and derive business operational intelligence. Expand report library to include cross-functional reports and deeper management reports based on improved metrics. Update and expand on SOP documentation. Develop mechanism to solicit and incorporate user feedback. Formalize onboarding materials for each IP functional area with required trainings (e.g., privacy/security, ethics, export control, trade secret and other items deemed business critical). 	<ul style="list-style-type: none"> Develop process ownership matrix with escalation/approval paths for changes. Evolve and expand metrics to ensure operational goals are being met at deeper level and derive business operational intelligence. Manage KPIs on routine basis with centralized ownership. Develop advanced reporting capabilities enabling deeper data analytics and business intelligence by combining multiple data sources. Collate SOP documentation and other KM into a single-sourced repository having ability for cross-team input, possibly including Q&A bots and chat features. Develop dedicated onboarding portal providing customized materials for each new hire based on their individual role/responsibilities and assigned mentor to assist with training and relationship-building internally and with OC.

TECHNOLOGY

TECHNOLOGY Proficiency Assessment

CATEGORY	Developing	Foundational	Advanced	Mature
Billing	<ul style="list-style-type: none"> Light touch or no invoice management system and/or no electronic billing solution (“e-billing”). 	<ul style="list-style-type: none"> Invoice management or e-billing solution allowing for invoice review and scalable payment system. 	<ul style="list-style-type: none"> E-billing solution that allows full visibility (e.g. client/matter, task level spend), with established. 	<ul style="list-style-type: none"> Electronic feedback mechanism for capturing input on vendors/OC fed into reporting platform.
Filing Management	<ul style="list-style-type: none"> Paper/fax filings by credit card or direct payment means and no use of electronic filing or deposit accounts. 	<ul style="list-style-type: none"> Joint USPTO Customer Number(s) with OC. Primary filing mechanism is through EFS Web or electronic means. OC handles all filing. 	<ul style="list-style-type: none"> USPTO Customer Number and Deposit Account established. ePCT and other foreign government office account(s) established. All filings managed electronically with automated USPTO PAIR scrapes and use of Global Dossier. 	<ul style="list-style-type: none"> Automated reconciliation of patent office information against LOB tool. Automated ability to upload file histories directly into system. Automated ability to download USPTO outgoing correspondence and bibliographic information from PAIR.
Idea Submission	<ul style="list-style-type: none"> Patent inventors submit disclosures via email; reviewed manually on ad hoc basis. No active mining or strategy. 	<ul style="list-style-type: none"> Requests for protection (patent, trade secret, copyright) through IP Management system; reviewed manually on a regular cadence. 	<ul style="list-style-type: none"> Protection request submittals (e.g., invention disclosures, potential trade secrets) flow through a workflow process related to accepting a disclosure, filing a new application, etc. Decision makers identified within the business or legal group who approve filings. 	<ul style="list-style-type: none"> Established system of invention submission, integrated with key systems (e.g. document management) and mining and co- development opportunities. Technology used to socialize and rate ideas pre-submission. All inventions are managed “end to end.”
Infrastructure	<ul style="list-style-type: none"> No IP-focused tools. 	<ul style="list-style-type: none"> Minimal/out-of-the-box IP specific tools and no defined cloud strategy. All on-premise hosting model for tools. 	<ul style="list-style-type: none"> Custom-tailored IP specific tools. Cloud-leveraged tools based on defined strategy and risk profile. Possible hybrid cloud model based on data privacy requirements. IP specific tools integrated with standard business productivity tools (communications, plug ins, DMS, billing, etc.). 	<ul style="list-style-type: none"> Use of AI and machine learning technologies (automated program or other technology) to replace routine manual tasks or answer questions.

CATEGORY	Developing	Foundational	Advanced	Mature
IP System	<ul style="list-style-type: none"> No technology or unsophisticated docketing system for tracking IP assets. IP assets tracked in spreadsheet(s) or no tracking at all; trade secret and copyright assets may not be tracked at all. 	<ul style="list-style-type: none"> Patent and TM assets in electronic IP management system with full docketing capabilities; trade secret and copyright assets tracked in spreadsheet(s). Regular cadence of law updates and system kept relatively current with upgrades (no more than 2 upgrades behind). 	<ul style="list-style-type: none"> Queries, reports and templates available for managing patent and TM assets, including docketing deadlines and reminders; trade secret and copyright assets integrated into electronic management system. System will produce seamless reports with corresponding figures/images. 	<ul style="list-style-type: none"> Dashboard(s) available to IP professionals (and other stakeholders, e.g., inventors) for real-time visibility and management of IP assets (e.g., patent families and prosecution status, products, licensing, contracts, marking/virtual marking). Use of technology for ongoing automated reconciliation of assets and docketing deadlines between in-house and OC to ensure accuracy and compliance with Patent Office deadlines.
IT Support Model	<ul style="list-style-type: none"> Lack of IT support in the areas of security, privacy, systems integrations and systems management for office systems. 	<ul style="list-style-type: none"> Designated IT resource(s) to manage in-house tools and mitigate issues, with no development capabilities. General knowledge/ understanding of privacy and security. 	<ul style="list-style-type: none"> Dedicated IT group with expertise in privacy and security as demonstrated through high standards applied to system. IP-focused IT experts to manage systems and integrations with some support and development capabilities, and responsibility for ensuring best practices applied to security/privacy standards. Regular training and knowledge around general tool/software usage. Basic security/privacy practices are established and managed. 	<ul style="list-style-type: none"> Developer expertise and proficiency to build, implement and integrate tools in-house.

TECHNOLOGY Proficiency Assessment

CATEGORY	Developing	Foundational	Advanced	Mature
Record Management	<ul style="list-style-type: none"> Paper files and/or no files maintained on assets. 	<ul style="list-style-type: none"> Combination of paper and electronic management of case files. 	<ul style="list-style-type: none"> Document management capabilities to store file histories and communications with minimal paper required. In-house intranet to house all key documents, processes, and information that is shared across the organization and centrally managed. Data retention policies implemented into tools with routine/timed reviews and purge mechanisms. System ability for OC to upload documents directly into IP asset management system. 	<ul style="list-style-type: none"> Fully integrated IP docket system and document management system through direct integration or APIs. Sophisticated data retention capabilities allowing for automated management/purging of relevant materials
Reporting	<ul style="list-style-type: none"> No reporting platform or capabilities to extract relevant data without manual interventions. 	<ul style="list-style-type: none"> Ability to produce real-time docket reports and track deadlines either in-house or through OC. Ability to provide basic portfolio data and metrics through system reporting or basic platform/tool. 	<ul style="list-style-type: none"> Comprehensive reporting platform enabling ability to combine data sources, produce metrics around portfolio assets, and track costs associated with the portfolio, in-house or via OC. Data science expertise sufficient to establish reports and data models/cubes. Integrations/APIs between LOB tool and other key business tools (e.g., with finance data). 	<ul style="list-style-type: none"> Sophisticated reporting platform with cross-group integration providing ability to accurately forecast spend and predict trends through use of technology and data models, in-house or via OC, also enabling visibility to IP licensing deals, monetization, etc. Six Sigma quality metrics around docketing/data processing with automated reporting/audit capabilities to compare internal and external data sources.

General

- Ad-hoc work and/or projects sent out to 3rd party vendor as needed (i.e., to alleviate existing backlog)
- Conduct as-needed meetings with 3rd party to review outsourced work and address pending issues

- Establish outsourced relationship, when feasible and appropriate, for the following tasks including but not limited to (in addition to Foundational tasks).

- 1) Docketing - Patent office correspondence entered in IPMS to generate deadlines, maintain accurate records and document portfolio information. Includes second eye quality assurance review and weekly PTO history audits to ensure no correspondence has been missed to be docketed.
- 2) Prosecution Support - Administrative support required for various types of preparations and filings during the course of prosecution.
- 3) IDS and Reference Management - Management of references and family relations to assist in preparing and filing Information Disclosure Statements.
- 4) Foreign Filing Support - Administrative support to instruct the filing of non-US applications.

- Establish outsourced relationship, when feasible and appropriate, including but not limited to (in addition to Foundational and Advanced tasks):

- 1) Notice of Allowance Review - Complete review of the US prosecution history to provide valuable summary of prosecution which includes a review package, allowed claims, and Issue fee transmittal.
- 2) Portfolio Acquisition Services - Provide administrative assistance when acquiring new portfolios, including new matter creation and data validation for online countries.
- 3) Patent Illustrations - Analyzing and drawing line art illustrations conforming to the standards of US, EP, PCT and other global PTOs.
- 4) Invoice Management - Reviewing, approving and paying agent invoices on behalf of the client in a centralized function with accounting expertise.
- 5) Patent Issue Fee Payments
